### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5, 8-11, 13, 14, 16-20, 23-25 and 27-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaule et al. (US 6,146,773).
- 3. Kaule discloses a security document with an embedded security thread (col. 2, lines 59-67 and Fig. 1). The security thread consists of a magnetic layer of iron or nickel, which is applied to a paper by resistance heating or electron beam evaporation (col. 3, lines 2-5, 16-19 and 39-42). In addition, the magnetic layer of iron or nickel can be coated with a further metallic layer, e.g. of a copper alloy, so as to bring about golden color effects (col. 4, lines 2-13). The claimed foreign metal is equivalent to any impurity that is contained in the alloy. Kaule does not expressly disclose how the colored metallic layer is produced, however, it can be expected that the layer is produced with the same method as the layer of iron, that is, using resistance heating or electron beam evaporation. Claims 2-5, 8-11, 13, 17-20, 23-25 and 27-35 do not appear to contain any additional features which, could lead to a subject matter that is novel. In fact, these claims relate to features which are either wholly standard in the art or lie within the scope of expert ability. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 6, 7, 12, 15, 21, 22 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaule et al. (US 6,146,773) in view of Hofmann et al. (US 4,791,017).
- 6. Kaule does not teach specific types of copper alloy. Hofmann teaches different types of copper containing alloys are provided on a coated substrate (Fig. 7 and Examples). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the alloys of Hofmann with the invention of Kaule so as to provide a golden color coating.
- At the time of the invention, it would have been obvious to a person of ordinary skill in the art to control the amount of the copper and/or the rest of the metal(s) in the alloy, so as to optimize the appearance of the color of the coating. Even though the thickness of the metallic layer of Kaule is not disclosed, it is taught in Hofmann that it is advantageous to have the thickness within a range of 0.05-1.0 micron (col. 3, line 40 of Hofmann).

### Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 571-272-1529. The examiner can normally be reached on Mon.-Fri. 8:00AM-4:30PM.

- 9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
